- » Certified Welding Services
- » Industrial Facility Rail Solutions
- » Construction Administration
- » Re-railing Service
- » Emergency 24/hr Service
- » New Track Construction
- » Production Rail + Tie Gangs
- » Design/Build Experience

ENGINEERED CONSTRUCTION

North Shore Track is comprised of rail professionals and engineers from many industries. Their design and construction experience, skills and knowledge are brought to bear on each project. NST is affiliated with Krech Ojard & Associates to provide a synergy of design and construction capabilities. Through this relationship, Krech Ojard's engineering staff is available to assist NST with any railroad track design or engineering requirements.

With the company built from the ground up by engineers and rail professionals from multiple industries, design and construction is where the NST team really excels. From industrial rail spurs to shortline and mainlines, from the oil industry to the mining industry, rail loops to sidings; NST can design and construct your next rail project.

MAINTENANCE

Railroad maintenance and repair is NST's specialty. From routine track repairs, to general maintenance, NST's railroad track experience is second to none. You can trust NST to keep your time critical systems on schedule.

When emergencies develop, NST can be reached 24 hours a day on our emergency number for rapid response, emergency repairs, rerailing and investigations.

CERTIFIED WELDING

RAILROAD TRACK WELDING SERVICES

NST offers rail and switch reconditioning with complete field welding services on new and in-service track for frogs, crossings, rail ends, switch points and stacker rail systems.

- » Frog Point and Wing Welding
- » Switch Point Welding
- » Rail End Welding
- » Thermite Welding
- » General Track Maintenance

All NST welders are certified for most railroad welding applications.

TRACK INSPECTIONS

North Shore Track offers FRA Certified Track inspections across North America.

Inspections are the best way to locate track deteriorations before they lead to expensive or dangerous situations and lead to system down time.

From Class 1 railroads to industrial spurs, NST has the experience to recognize problems, recommend and quickly design solutions and timelines for repair that fit your company's schedules.

EQUIPMENT

Nothing beats the combination of experienced labor, and railroad industry experience. But track work is serious business and NST has the tools, equipment and experience to make it happen.

- » Production Tampers
- » Ballast Regulators
- » Hy-Rail Rotary Dump Trucks
- » Material Handling & Welding Trucks - High Rail Gear
- » Production Spiker
- » Tie Extractors/Inserter
- » Hy-Rail Loaders
- » Re-Railing Equipment
- » Excavators
- » Backhoes/Loaders/Bobcats
